

## 1. Trucker Path

- **What it does:** Trucker Path is an app made for the needs of truckers. It offers routing directions appropriate for big rigs, bypassing low bridges, tight corners, and other hazards. The app also helps drivers find truck stops, rest stops, weigh scales, and gas stations. It has an electronic logbook feature to help drivers keep track of Hours-of-Service regulations.
- **Cost:** There is a free basic version of Trucker Path. It also has a premium version called Trucker Path Pro. The premium version offers more features like real-time parking availability and real-time fuel price information.
- **Device Compatibility:** Trucker Path is available on **iOS** and **Android** devices.

## 2. Fuelbook by EROAD

- **What it does:** Fuelbook is a truck driver fuel tracking and fuel purchase application. It enables drivers to record fuel transactions, calculate fuel taxes, and keep an eye on fuel efficiency. The app is integrated with electronic logging devices for easily tracking driving hours and fuel usage. It also helps drivers find truck-friendly fuel stops and compare fuel prices.
- **Cost:** Fuelbook is free to download and use, but some of its additional features can be accessed through subscription or integration with EROAD's ELD services.
- **Device Compatibility:** Fuelbook is available on **iOS** and **Android** devices.

## 3. DAT One

- **What it does:** DAT One is one of the most popular apps around. It connects truck drivers to shippers and brokers, and allows them to search for loads by location, freight type, and payment conditions. The app also includes tools for route planning, fuel budgeting, and load tracking. And it even assists drivers in managing permits and compliance documents.
- **Cost:** DAT One offers a free trial, but full access requires a subscription fee. Cost varies based on the service level and features required.
- **Device Compatibility:** DAT One is available on **iOS** and **Android** devices.
